

SENSS Specialist Training: Introduction to Computational Methods

19 May 2026

Baris Ari

Welcome to the Training Event

Instructor Info

Dr Barış Ari

Lecturer in Political Science

University of East Anglia

E-mail: baris.ari@uea.ac.uk

Plan of Day 1

- Welcome
- Part 1: Introduction to CSS: What is CSS?
- Part 2: Complexity and Science
- Part 3: Schelling's Segregation Model
 - Agent-Based Model (computational simulation)
- Part 4: Questions and exploration

Plan of Day 2

- Complex adaptive systems and agent-based models
- Building agent-based models
- How to ask AI to code for you?
- Exploration of further models

Role of Coding in this Event

- This is not a training on Python or NetLogo
- Any environment you like:
 - Python, R, NetLogo, C, ...
 - a piece of paper
- Python & Netlogo: web versions

Resources and Training Material

- GitHub: <https://github.com/baris-ari/css.git>
- A coding environment: Python and NetLogo
- Google Colab (to run Python on browser):
<https://colab.research.google.com/>
- NetLogo Desktop: <https://www.netlogo.org/>
- NetLogo Web: <https://www.netlogoweb.org>
- AI to get help for coding syntax (in day 2)
